# Network & Cloud Engineer

## Who we are

Unmanned Life is a multi-award winning, AI led SaaS company, who have developed the world's first 5G and AI enabled software platform for seamless orchestration of autonomous robotics devices (UAV, AGV etc.). Our adaptable platform delivers commercial grade autonomous solutions including; drone surveillance, search and rescue, asset tracking and we have future plans to use our software to orchestrate environmental tasks like reforestation too!

We are a growing company with offices in London, Brussels & Barcelona and in a relatively short time, we've built strong relationships with several Fortune 500 partners with global opportunities across Europe, USA & Middle East.

Unmanned Life are seeking a talented Network & Cloud Engineer with several years of professional experience; who is eager for an exciting new opportunity in a fast growing business at early stages.

This role is ideally Barcelona based, with 3 days per week in the local office and regular travel required.

## As the Network & Cloud Engineer, you will:

- To support other team-mates in all the networks aspects or issues that can arise in our deployments
- To design, deploy, optimize, and support network, cloud, and security aspects in our deployments across all customers
- To provide solutions to issues related to the connection of networks and platforms
- To devise ideas, methods and procedures for technologies of interest, to improve and enhance our products, platform, and solutions in all the aspects related to network optimization, cloud deployment and security
- To own stakeholder engagement and relationships with partners, suppliers, and clients.
- To process, assess and synthesise information including preparation of technical documentation, with problem diagnostics and technical analyses in your domain

## Who you are

- Bachelor or master's in Computer Science or Telecommunications or a related technical discipline
- Minimum of 3 years of relevant experience in the field in networking, IOT protocols and cyber-security
- Expert knowledge of TCP/IP and IPv4 & IPv6.
- Knowledge and experience with HTTP based communication protocols like API (REST or SOAP) and WebSocket
- Strong Linux experience
- Experience in configuration and maintenance of network devices, or applications such as web servers, load balancers or databases
- Cloud platforms knowledge and experience i.e. AWS or Azure

- Knowledge and hand-on experience of technologies such as VPN, P2P, Mobile Edge Computing and 5G and 4G network
- Proficiency in containerization i.e. Docker and Kubernetes
- Should have the knowledge to deploy and run application software on virtual machines
- Programming – Should have general programming skills and knowledge of languages such as C++ and Python

## What's in it for you

- Competitive Salary + Share options
- Referral bonus scheme
- Hybrid Working
- Lunch & Travel cost contribution
- Fun & collaborative working environment

## How to apply

Please apply online or by sending your **Cover Letter and CV** to [careers@unmanned.life](mailto:careers@unmanned.life). It is encouraged to apply ASAP as candidates are being processed until vacancy is fulfilled.

We believe that diversity is the key component to achieving true innovation. We embrace uniqueness and continually strive for equity for all. Ultimately, our team powers Unmanned Life. We want all our employees to feel valued and appreciated for who they are, where they come from, and what they've achieved. Our employee policy is designed to prevent discrimination regardless of gender identity or expression, sexual orientation, religion, ethnicity, age, neurodiversity, disability status, citizenship, or any other aspect which makes them unique.

Our diverse team is highly motivated and unites on our mission to become the go to software platform for the seamless orchestration of autonomous robotics. To find out more visit: <https://unmanned.life/>

**IMPORTANT** - When applying please clearly specify your nationality and if you believe you will need an authorization, visa or other paperwork to live and work in Barcelona, Spain.
